## ABOUT ME

---

Frontend Developer with a UX/UI design foundation and 2+ years shipping complete websites to production. I own the full cycle from Figma wireframes to deployed, responsive code: e-commerce platforms, content sites, and custom landing pages for real businesses. My design background means I don't just implement interfaces, I make the visual and interaction decisions behind them, with a focus on accessibility, detail, and user experience.

## EXPERIENCE

---

### Frontend Developer & UX/UI Designer

*Panambi*

*Argentina*

*2025-2026*

- Co-designed the UX/UI in Figma and independently built the frontend for a production e-commerce platform selling online courses and digital products in the holistic-health space (panambiholos.com).
- Shipped core user flows end to end: product catalog, checkout, user authentication, and blog.
- Collaborated with the backend developer to build an admin panel for sales management and content publishing, reducing manual work for the client. Project ongoing.

### Frontend Developer & UX/UI Designer

*Ana Castro*

*Argentina*

*2025*

- Designed and built a public-speaking coach's entire website solo, from Figma mockups to production (anacastro.com.ar, Astro): home, about, courses, mentoring, video section, and blog.
- Implemented a contact form wired into a custom admin panel for lead management.
- Owned the full client relationship: requirements, design reviews, iterations, and delivery.

### UX/UI Designer & Frontend Developer

*Innovamed*

*Argentina*

*2024-2025*

- Designed and delivered the UX/UI and frontend for a medical clinic website (innovamedcba.com) covering treatments, protocols, office locations, and blog.
- Built a contact form integrated with EmailJS, enabling direct patient inquiries without backend infrastructure.
- Debugged and refined cross-browser and responsive issues across the entire site.

## SKILLS

---

- **Frontend:** TypeScript, JavaScript (ES6+), React, Astro, HTML5, CSS3, Tailwind CSS, Responsive Design, Web Accessibility
- **Design:** Figma (wireframing, prototyping, design systems), design-to-code handoff, UX/UI fundamentals
- **Tooling:** Git & GitHub, Firebase, Cloudflare Pages, EmailJS
- **AI in Workflow:** LLM-assisted development, AI coding agents

## PROJECTS

---

### Personal Portfolio (mnahum.com)

*2026*

Designed and built my developer portfolio from scratch with Astro and TypeScript: custom interactive animations, a working contact form, and CI deployment on Cloudflare Pages.

## EDUCATION

---

### Universidad Nacional de Córdoba — FaMAF, Argentina

*Computer Science*
